# **Using Transitions Effectively**

#### What do Transitions Do?

Transitional words and phrases are also called signal words. They are placed at key points to lead the reader through the sentences and paragraphs. Using transitional words will help you achieve clear and coherent communication with your audience.

When writers connect sentences and paragraphs, they provide a sense of movement that allows their readers to follow the main and subordinate ideas easily and, as a result, understand the writer's purpose and message.

Clear transitions are essential to the coherence of paragraphs and essays. There are several types of transitions, each leading the reader to make certain connections or assumptions about the areas you are connecting, based on the words or phrases you choose. Some lead the reader forward and imply the "building" of an idea or thought, while others make the reader compare ideas or draw conclusions from the preceding thoughts. A list of common transitional words and phrases can be found on the back.

#### **Transitions Between Paragraphs**

When linking two paragraphs, the writer must explain how the two paragraphs are connected logically. Transitional words or phrases sometimes will be precisely what you need to underscore for your readers the intellectual relationship between paragraphs—to help them navigate your essay. Very often, such transitions:

- Address an essential similarity or dissimilarity (likewise, in contrast, despite, etc)
- Suggest a meaningful ordering, often temporal (first, in addition) or causal (thus, therefore)
- In a longer paper, remind the reader of what has earlier been argued (in short, as has been said, on the whole).

### Tips for Transitioning

Since clarity and effectiveness of your transitions will depend greatly on how well you have organized your paper, you may want to evaluate your paper's organization before you work on transitions. In the margins of your draft, summarize in a word or two what each paragraph is about or how it fits into your analysis as a whole. This exercise should help you to see the order and connection between your ideas more clearly.

If after doing this exercise you find that you still have difficulty linking your ideas together in a coherent fashion, you problem may not be with transitions but with organization. Perhaps something crucial is missing between this paragraph and it neighbors—most likely an idea o a piece of evidence or both. Maybe the paragraph is misplaced, and logically belongs elsewhere.

#### Common transitional words and phrases can be found on the next page...
